SAP BUSINESS ONE

VERSUS LISA WMS

---

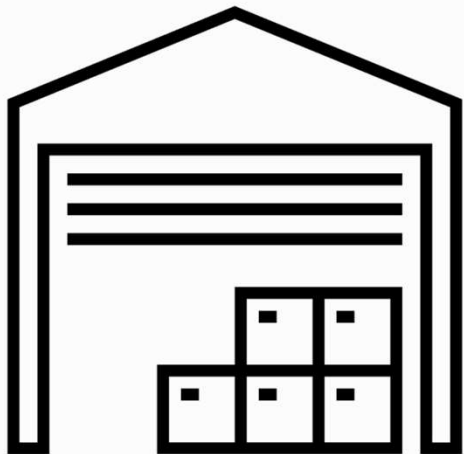

- Serve different purposes within a business's operations
- SAP B1 provides the foundations managing multiple integrated areas.
- Though it provides great features it lacks the capabilities of a true WMS like LISA.
- Operations are run in a manual and labor-intensive manner.

SAP BUSINESS ONE

**VERSUS**

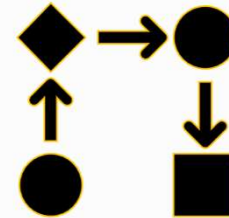

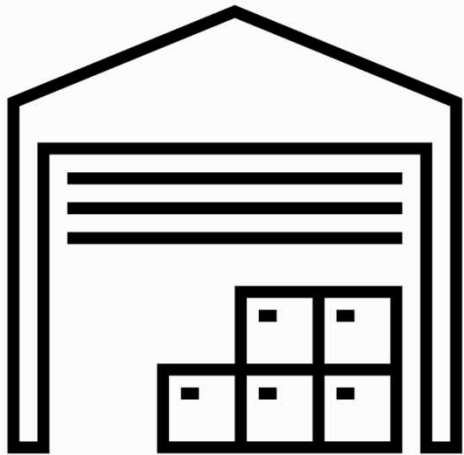

LISA WMS

---

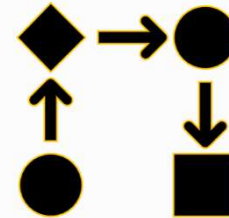

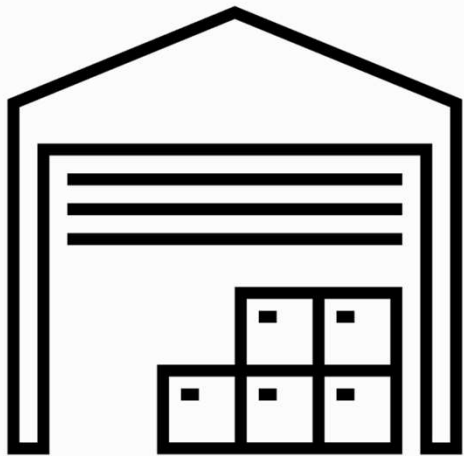

- Serve different purposes within a business's operations
- SAP B1 provides the foundations managing multiple integrated areas.
- Though it provides great features it lacks the capabilities of a true WMS like LISA.
- Operations are run in a manual and labor-intensive manner.

## VALUE PROPOSITION

---

- 1 error on every 300 keystrokes vs 1 in 3 millions
- Barcode reading is 9x faster than manual input
- Implementation of barcodes at receiving can increase the inventory accuracy by 78%
- Directed activities can increase productivity by 50%(picking alone is 50% of work force expenditure)
- Significantly reduce/eliminate shipping errors
